

Student Design Project Idea Wiki

REQUIREMENTS:

Application Software: LabVIEW Base Development System Development Topic: Development Tools and Guidelines

Have a cool design project you did freshman year, senior year, or anywhere in between?

Share it with current students looking for ideas! I have gathered a number from our Applications Engineers they did in school that I will be posting to give you some ideas, but please add yours to NI Developer Zone Community as a tutorial or even to this wiki document!

The template for submitting to the community and a cool example of a student design project that was featured at NIWeek 2007 is attached.

Please do not put up entire solutions. After all, it's supposed to be a design project!
